

ISI GREEN

Central power systems are the most environmentally friendly emergency lighting choice.

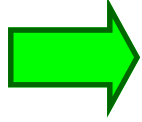

ISI has the greenest of the green!

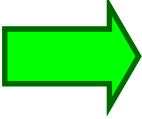

Inverters eliminate the need for wasteful wall mounted emergency lights.

Inverters don't exhaust greenhouse gases like generators, or burn fuel.

ISI inverters are the most efficient - saving up to \$4700/year in electric!

ISI inverters create the least heat - saving further energy in air conditioning.

**Think
Safety**

**Think
Future**
