

*The most reliable, LED compatible, and economical alternative to battery packs and generators.*

- ☐ **Fulllight output** - Turn any fixture into a full light output emergency fixture for 90 minutes
- ☐ **Compatible with all LED's**, electronic and magnetic fluorescent ballasts, incandescents, CFL's, halogens, and induction lamps.
- ☐ **Easy to install, inexpensive to maintain** - self-contained, modular construction designed for 25 year trouble-free electronics life.  
**Customizable options** - Automatic testing, custom voltages/frequency, heated outdoor enclosures and more are available upon request.
- ☐ **Fully-controllable emergency lighting** - integrates seamlessly with LVS Emergency Power Controls (EPC's) to give dimming and switching capability to emergency lighting.
- ☐

**UL924 LISTED**

**MADE IN USA**  
**ARRA Compliant**

Wasting with battery packs

LED/Fluorescent Battery Packs	CEPS Inverters
<b>600-1400 lumen/xture</b> <i>Reduced light output</i>	<b>4000 lumen/fixture</b> <i>Full light output</i>
<b>Monthly Manual Testing</b> <i>Each fixture must be tested manually</i>	<b>Automatic Diagnostics</b> <i>Eliminates monthly manual testing</i>
<b>Total replacement required</b> <i>The cost of testing &amp; replacing a single battery pack can exceed \$1000 over 25 years</i>	<b>Field-replaceable Batteries</b> <i>Single location and battery disconnects make service quick and easy</i>

Pure Sine Wave  
LED Compatible

No Factory  
Startup Needed

Industry-Leading  
Warranty

In-Stock

Offered in a dozen sizes from 25W to 2kW!
